The raw data presented in this folder consists of **40** articles from SunStar (March 30, 2023 - April 26, 2023) and **338** articles from Baguio Midland Courier (March 12, 2023 - April 16, 2023) . Each article gathered consists of their own respective title, data, and content. The scraping tool that was used to extract the raw data is Selenium, an open source umbrella project for a range of tools and libraries aimed at supporting browser automation.

For future directions, the group will tokenize these articles which will be followed by Exploratory Data Analysis and Pre-processing techniques.
